

# NEWS FROM TEXA

*As part of our policy to constantly improve our products, offering even better performance to respond to the market demands, over the next few months the DEK•SKY•EGO ranges will be equipped with the following innovative features as standard:*

Disassembly of front casing by means of 2 screws only, consequently maintenance times are cut down to a great extent.

**EGO•DEK•SKY: Intelligent electronic control.**

For constant system operation diagnostics

- digital display showing set temperature at all times
- immediate fault diagnosis
- compressor power off whenever door is opened to prevent formation of condensation
- control over compressor starts at short intervals
- PLC interface possible
- reduced operating costs

Improved styling with increased radius corners

Easy filter replacement.
